When customers search for a specific new or used truck, automotive, boat, trailer or RV are they finding the vehicle that is located on your lot ready to buy?

Many people search locally for the vehicle, RV or trailer they are searching for so they can come into the dealership for a test drive and kick the tires. Our Customized Website Inventory Database creates the correct titles and descriptions that are then indexed into Google. That way when your keywords are used by a buyer in your area, your listing comes up at the top of the search. You can list thousands of automobiles, trucks, RV motor homes, boats, trailers or any large equipment using dozens of data fields we customize just for your needs. All from the comfort of your dealership with **NO monthly maintenance fees!**

Your Custom Dealership Website Design Could Include:

- Customized vehicle inventory database
- Searchable and sorted inventory list page
- Custom data fields with room for unlimited details
- Multiple photo views loaded to the website from your desktop
- Custom contact lead generation form with vehicle details
- Schedule a test drive lead generation email with vehicle details
- Custom design with dealer content management system
- Dealership services and information
- Dealership parts information and sales
- Dealership directions and maps
- Dealer brand pages for custom promotions
- Customer testimonials
- Staff information, certifications and photos
- Dealer promotions or specials page
- Finance application forms
- Multiple location support
- Window sticker upload and print options
- Full Search Engine Optimization (SEO)
